◆ ADF

Note

- ☐ When copying custom size originals, make sure you specify the size of the originals. If not, the image may not be copied properly. See p.17 "Placing custom size originals".

Sizes difficult to detect

It is difficult for the machine to automatically detect the sizes of the following types of originals, so select the paper size manually.

- Originals with indexes, tags, or other protrusions
- Transparent originals such as OHP transparencies or translucent paper
- Text or picture dense original
- Originals containing solid images
- Originals containing solid images around their edges

Missing Image Area

Even if you correctly place originals in the ADF or on the exposure glass, margins of a few millimeters on all four sides of the original might not be copied.

1. 0 - 4.0 mm, 0"- 0.16"

3. 0 - 4.0 mm, 0"- 0.16"

2. 0 - 4.0 mm, 0"- 0.16"

4. 2.0 - 6.0 mm, 0.08"- 0.24"

Placing Originals

Note

- Place originals only when all correction fluid and ink has completely dried. Not taking this precaution could dirty the exposure glass, thus resulting in blemished copies.

Reference

For original sizes you can set, see p.9 "Originals".

Original Orientation

This function is useful for copying torn originals or large originals.

You can set the original orientation in the following ways.

◆ Standard orientation

Select this function when original orientation is the same as copy paper orientation.

◆ 90° turn

Use this to copy A3  or B4 JIS  or 11" × 17"  size originals. The machine rotates the copy image by 90°. This is useful for copying large originals using the Staple, Duplex, Combine, or Stamp functions.

For example, to copy A3  or 11" × 17"  originals with the Staple function selected:

AAE0435

Note

- It is recommended that you use the Original Orientation function with the Auto Paper Select or Preset Reduce/Enlarge function.

1 Press [Special Original].

2 Select the original orientation.

Standard orientation

1 Make sure  is selected.

90° turn

1 Place the original in the landscape orientation, and then press .

3 Press [OK].

Placing Originals on the Exposure Glass

1 Lift the ADF.

Important

Do not lift the ADF forcefully. Otherwise, the ADF cover might open or be damaged.

Note

- Be sure to lift the ADF more than 30°. Otherwise, the size of the original might not be detected correctly.
- Be sure not to press the ADF too hard; otherwise, the left scale and the Exposure Glass may be bent and cause a malfunction.

2 Place the original face down on the exposure glass. It should be aligned with the rear left corner.

ZEW050E

1. Reference mark

2. Left Scale

Note

Start with the first page to be copied.

3 Lower the ADF.

Placing Originals in the ADF

Settings should be made accordingly in the following situations:

- ❖ **When placing originals consisting of more than 50 pages:**
p.15 “Batch”
- ❖ **When placing originals one by one:**
p.16 “SADF”
- ❖ **When placing originals of the same width but different sizes:**
p.16 “Placing originals of mixed sizes”
- ❖ **When placing custom size originals:**
p.17 “Placing custom size originals”

Note

The following basic functions are explained in this section.

❖ Auto Color Selection

Judges the color of the original automatically, and copies either in full color or black/white.

Note

- When using Auto Color Selection, the machine decides whether to copy in full color or black and white by examining the central part of the original. Because of this detection method, small full-color originals such as business cards may be detected as black and white. When copying small full-color originals, we recommend you select the Full Color Copy.

❖ Full Color Copy

Copies by overlaying yellow, magenta, cyan, and black.

❖ Black/White Copy

Copies in black regardless of the color of the original.

❖ Single Color Copy

Note

- You can select from basic colors and registered colors.
- Two Color Copy (Red & Black)

User Color

You can register colors created by adjusting the density of yellow, magenta, cyan, and black. You can also name the colors that you register, and print out registered colors.

Reference

For types and examples of the image adjustment functions, see p.iii "What You Can Do with This Machine <Color Functions/Color Adjustments>".

The following show you how to create colors:

- Adjust the density of each color using the density of a chosen basic color.
- Directly specify the density of each color using the number keys.

Note

- Adjust the colors to be registered such that the total density of yellow, magenta, cyan, and black is under 255%.
- When the total density of a registered color is over 256%, it will be corrected to 255%.
- When copying with user colors, the finer shades may vary depending on the condition of the machine.
- In order to correctly reproduce originals, the values entered are corrected by the machine, and copies are made using the optimum values. Therefore, there may be slight color differences when copying using "Text" and when using "Photo".
- Up to 15 colors can be registered.

- Sample prints of user colors can also be made on an A4 \square , $8\frac{1}{2}$ " \times 11" \square size page or on an A3 \square , 11" \times 17" \square size page.

◆ Zoom

- The reproduction ratios you can specify are 25–400%.
- You can select a ratio regardless of the size of an original or copy paper. With some ratios, parts of the image might not be copied or margins will be displayed on copies.

◆ Size Magnification

- If the calculated ratio is over the maximum or under the minimum ratio, it is automatically adjusted to within available range. However, with some ratios, parts of the image might not be copied or margins will be displayed on copies.
- The reproduction ratios you can specify are 25–400%.

◆ Directional Size Magnification

- The reproduction ratio you can specify are 25–400%.
- When entering a percentage ratio, you can specify any value in the permitted range, regardless of original or copy paper size. However, depending on settings and other conditions, part of the image may not be copied, or margins will be displayed on copies.
- When entering a size in millimeters or inches, and the calculated ratio is over the maximum or under the minimum ratio, it will be automatically adjusted to within available range. However, with some ratios, parts of the image might not be copied or margins will be displayed on copies.

Note

- When using the Rotate Sort or Staple functions, the capacity may be reduced.
- When using the Duplex and the Rotate Sort functions combined, copying speed may be reduced.

◆ Staple

- The following types of paper cannot be stapled:
 - Translucent paper
 - OHP transparencies
 - Label paper (adhesive labels)
 - Thick paper
 - Curled paper
 - Paper of low stiffness
 - Paper of mixed sizes
- In the following cases, copies will be delivered to the shift tray without stapling:
 - When the number of sheets for one set is over stapler capacity
 - When memory reaches 0% during copying

- When using Double Copies, or [1 Sided→1 Sided], [1 Sided→2 Sided], [2 Sided→1 Sided], or [2 Sided→2 Sided] in Combine mode, select paper for original and paper for original.
- When using Double Copies, or [1 Sided 2 Pages→ 1 Sided Combine] and [1 Sided 4 Pages→ 2 Sided Combine] in Combine mode, select paper for original and paper for original.
- When using [Left 2] or [Top 2] with Double Copies, or [1 Sided→1 Sided], [1 Sided→2 Sided], [2 Sided→1 Sided], or [2 Sided→2 Sided] in Combine mode, select paper for original and paper for original.
- When the finisher is installed, even if you place different size originals in the ADF, appropriate size of copy paper can be automatically selected and stapled using the Mixed Size mode and Auto Paper Select function. Load the paper you want to use in the paper trays beforehand. Paper sizes that can be stapled when using the Mixed Size mode are as follows:
 - A3 and A4
 - B4 JIS and B5 JIS
 - 11" × 17" and 8¹/₂" × 11"
- Paper sizes and orientation that can be used in the Staple function and the stapler capacity are as follows:

| | Paper size | Stapler capacity |
|---------------------|---|---------------------------------|
| 500-Sheet Finisher | A3 <input type="checkbox"/> , B4 JIS <input type="checkbox"/> , A4 <input type="checkbox"/> <input type="checkbox"/> , B5 JIS <input type="checkbox"/> , 11" × 17" <input type="checkbox"/> , 8 ¹ / ₂ " × 14" <input type="checkbox"/> , 8 ¹ / ₂ " × 13" <input type="checkbox"/> , 8 ¹ / ₂ " × 11" <input type="checkbox"/> <input type="checkbox"/> , 8K <input type="checkbox"/> , 16K <input type="checkbox"/> | 30 sheets (80g/m ²) |
| 1000-Sheet Finisher | A3 <input type="checkbox"/> , B4 JIS <input type="checkbox"/> , 12" × 18" <input type="checkbox"/> , 11" × 17" <input type="checkbox"/> , 8 ¹ / ₂ " × 14" <input type="checkbox"/> , 8 ¹ / ₂ " × 13" <input type="checkbox"/> , 8 ¹ / ₄ " × 13" <input type="checkbox"/> , 8" × 13" <input type="checkbox"/> , 8K <input type="checkbox"/> | 30 sheets (80g/m ²) |
| | A4 <input type="checkbox"/> <input type="checkbox"/> , B5 JIS <input type="checkbox"/> <input type="checkbox"/> , 8 ¹ / ₂ " × 11" <input type="checkbox"/> <input type="checkbox"/> , 7 ¹ / ₄ " × 10 ¹ / ₂ " <input type="checkbox"/> <input type="checkbox"/> , 16K <input type="checkbox"/> <input type="checkbox"/> | 50 sheets (80g/m ²) |

- When the original image is rotated, the staple orientation changes by 90°.
- The maximum original image size that can be rotated is as follows.

| | |
|----------------|---------------------------------------|
| Metric version | A4 |
| Inch version | 8 ¹ / ₂ " × 11" |

When "Left 2" or "Top 2" is selected, the following settings are useful to rotate images appropriately:

- "Auto Reduce/Enlarge" or "Auto Paper Select"
- "With image rotation" in "Auto Tray Switching" of User Tools

◆ Duplex

- You cannot use the following copy paper with this function:
 - Paper thicker than 105 g/m², 28 lb.
 - Paper thinner than 64 g/m², 17 lb.
 - Translucent paper
 - OHP transparencies
 - Label paper (adhesive labels)
- When an odd number of originals is placed in the ADF, the back of the last page of copied paper is blank.
- During copying, the image is shifted to allow for the binding margin.
- The following paper sizes can be duplexed: A3☐, B4 JIS☐, A4☐☐, B5 JIS☐☐, A5☐☐, 11" × 17"☐, 8¹/₂" × 14"☐, 8¹/₂" × 13"☐, 8¹/₂" × 11"☐☐, 8¹/₄" × 13"☐, 8" × 13"☐, 7¹/₄" × 10¹/₂"☐ 5¹/₂" × 8¹/₂"☐, 16K☐☐, 8K☐

◆ Combine

- You cannot use the bypass tray with this function.
- In this mode, the machine selects the reproduction ratio automatically. This reproduction ratio depends on copy paper sizes and the number of originals.
- The reproduction ratios you can specify are 25–400%.
- If the calculated ratio is under the minimum ratio, it will be automatically adjusted to within acceptable range. However, with some ratios, parts of the image might not be copied.
- You cannot use custom size paper.
- A separation line between originals can be printed with the User Tools. ⇒ p.115 "Separation Line in Combine"
- If the orientation of originals is different from that of the copy paper, the machine will automatically rotate the image by 90° to make copies properly.
- If the number of originals placed is less than the number specified for combining, the last page segment will be left blank as shown.

◆ Series Copies

- The machine sets the reproduction ratio automatically to meet the paper size and copies the originals together onto the paper.
- The reproduction ratios you can specify are 25–400%.
- If the calculated ratio is under the minimum ratio, it is automatically adjusted to within acceptable range. However, with some ratios, parts of the image might not be copied.
- If the orientation of originals is different from that of the copy paper, the machine will automatically rotate the image by 90° to make copies properly.
- You cannot copy with originals different in size and orientation.
- If the number of originals scanned is less than a multiple of 4, the last page is copied blank.
- In Magazine or Booklet mode, the copying may take some time after scanning originals.
- When the 1000-Sheet finisher is installed, if you select Saddle Stitch function in Magazine or Booklet mode, the machine staples and folds the paper in the center, then delivers the paper folded.

◆ Image Repeat

Depending on the paper size, ratio, and orientation, parts of repeated images may not be copied.

◆ Centring

Though the original is set to a different orientation from the paper loaded, the machine will not rotate the image by 90° (Rotate copy).

◆ Erase

The width of the erased margin varies depending on the reproduction ratio. If the size of the original is different from sizes listed in the following chart, the erased margin might be shifted:

- Metric version

| Where original is placed | Paper size and orientation |
|--------------------------|---|
| Exposure glass | A3☐, B4 JIS☐, A4☐☐, B5 JIS☐☐, 8 ¹ / ₂ " × 13"☐ |
| ADF | A3☐, B4 JIS☐, A4☐☐, B5 JIS☐☐, A5☐☐, 8 ¹ / ₂ " × 13"☐ |

- Inch version

| Where original is placed | Paper size and orientation |
|--------------------------|---|
| Exposure glass | 11" × 17"☐, 8 ¹ / ₂ " × 14"☐, 8 ¹ / ₂ " × 11"☐☐ |
| ADF | 11" × 17"☐, 8 ¹ / ₂ " × 14"☐, 8 ¹ / ₂ " × 11"☐☐, 10" × 14"☐, 5 ¹ / ₂ " × 8 ¹ / ₂ "☐☐ |

◆ Margin Adjustment

- If you set a binding margin that is too wide, part of the image may not be copied.
- When making copies in Combine mode, the binding margin is added to the copies after the combination is finished.

◆ Background Numbering

If the numbers overlap the copied image, the parts overlapped may look like some pattern.

◆ Preset Stamp

- You can change the size and density of the stamp with User Tools. Depending on the setting, density may change.
- Depending on paper size, if you change the stamp size, parts of the stamp might not be printed.

◆ Date Stamp

- When using Combine mode, the date stamp is printed as follows:

- When using Magazine or Booklet function, the date stamp is printed as follows:

◆ Page Numbering

When page numbering is used with Combine mode, page numbers are printed as follows:

- Page Numbering per original:
Combined with 1 Sided / 2 Sided in the Combine function

- Page Numbering per copy:
Combined with Magazine or Booklet function

- Page Numbering per copy:
Combined with 1 Sided / 2 Sided in the Combine function

If you combine this function with the Duplex (Top to Top) function and select [P1, P2] or [1/n, 2/n], page numbers on the back are printed as follows:

6

1. Front

2. Back

◆ Front Cover, Front/Back Cover

- If Blank mode is selected, the cover will not be counted as a copy.
 - Front and back covers are two-sided copied depending on the settings made in Display Time in Cover Sheet Tray of User Tools (System Settings).
 - If Display Time is selected to the At Mode Selected, settings made in Cover Sheet Tray will take priority.
 - If Display Time is selected to Full Time, settings made in Paper Type will take priority.
- See “Paper Type” and “Cover Sheet Tray” in “Tray Paper Settings”, *General Settings Guide*.

◆ Slip Sheets

If you do not copy onto slip sheets, they are excluded from the number of copies counted.
