## SPECIFICATION

|               |  |                                     |   |
|---------------|--|-------------------------------------|---|
| Amplifier     | Output Power                                 | 20 W (10 W + 10 W) at 4 Ω (10% THD) |   |
|               | Audio input sensitivity/Impedance (at 1 kHz) | AUX                                 | 500 mV/48.75 kΩ   |
|               | Speakers/Impedance                           | 4 Ω                                 |   |
| Tuner         | FM tuning range                              | 87.50 MHz - 108.00 MHz              |   |
|               | AM tuning range                              | AM 10 kHz intervals                 | 530 kHz - 1 710 kHz   |
| CD player     | Dynamic range                                | 85 dB                               |   |
|               | Signal-to-noise ratio                        | 90 dB                               |   |
|               | Wow and flutter                              | Immeasurable                        |   |
| Cassette deck | Frequency response                           | Normal (type I)                     | 50 Hz - 15 000 Hz   |
|               | Wow and flutter                              | 0.15% (WRMS)                        |   |
| Speaker       | Speaker units                                | Full range                          | 8.0 cm cone × 1   |
|               | Impedance                                    | 4 Ω                                 |   |
|               | Dimensions (approx.)                         | 135 mm × 203 mm × 190 mm (W/H/D)    |   |
|               | Mass (approx.)                               | 1.7 kg each                         |   |
| General       | Power requirement                            | AC IN                               | 110 V/ 127 V/ 230 V ,<br>adjustable with the voltageselector,<br>50 Hz/ 60 Hz |
|               |  | DC IN                               | 12 V, 4 A   |
|               | Power consumption                            | 35 W (at operation)                 |   |
|               |  | 3.0 W (on standby)                  |   |
|               | Dimensions (approx.)                         | 412 mm × 208 mm × 275 mm (W/H/D)    |   |
|               | Mass (approx.)                               | 6.5 kg                              |   |

# SECTION 1

## PRECAUTION

### 1.1 Safety Precautions

- (1) This design of this product contains special hardware and many circuits and components specially for safety purposes. For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Services should be performed by qualified personnel only.
- (2) Alterations of the design or circuitry of the product should not be made. Any design alterations of the product should not be made. Any design alterations or additions will void the manufacturers warranty and will further relieve the manufacture of responsibility for personal injury or property damage resulting therefrom.
- (3) Many electrical and mechanical parts in the products have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of Service Manual. Electrical components having such features are identified by shading on the schematics and by ( $\Delta$ ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement parts shown in the Parts List of Service Manual may create shock, fire, or other hazards.
- (4) The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard. When service is required, the original lead routing and dress should be observed, and it should be confirmed that they have been returned to normal, after reassembling.
- (5) Leakage shock hazard testing

After reassembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock. Do not use a line isolation transformer during this check.

- Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal parts of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5mA AC (r.m.s.).

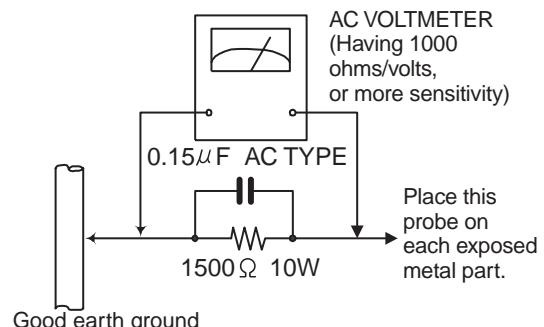

- Alternate check method

Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having, 1,000 $\Omega$  per volt or more sensitivity in the following manner. Connect a 1,500 $\Omega$  10W resistor paralleled by a 0.15 $\mu$ F AC-type capacitor between an exposed metal part and a known good earth ground.

Measure the AC voltage across the resistor with the AC

voltmeter.

Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now, reverse the plug in the AC outlet and repeat each measurement. Voltage measured any must not exceed 0.75 V AC (r.m.s.). This corresponds to 0.5 mA AC (r.m.s.).

### 1.2 Warning

- (1) This equipment has been designed and manufactured to meet international safety standards.
- (2) It is the legal responsibility of the repairer to ensure that these safety standards are maintained.
- (3) Repairs must be made in accordance with the relevant safety standards.
- (4) It is essential that safety critical components are replaced by approved parts.
- (5) If mains voltage selector is provided, check setting for local voltage.

### 1.3 Caution

**Burrs formed during molding may be left over on some parts of the chassis.**

**Therefore, pay attention to such burrs in the case of performing repair of this system.**

### 1.4 Critical parts for safety

In regard with component parts appearing on the silk-screen printed side (parts side) of the PWB diagrams, the parts that are printed over with black such as the resistor (■), diode (■) and ICP (●) or identified by the " $\Delta$ " mark nearby are critical for safety. When replacing them, be sure to use the parts of the same type and rating as specified by the manufacturer.  
(This regulation dose not Except the J and C version)

## 1.5 Preventing static electricity

Electrostatic discharge (ESD), which occurs when static electricity stored in the body, fabric, etc. is discharged, can destroy the laser diode in the traverse unit (optical pickup). Take care to prevent this when performing repairs.

### 1.5.1 Grounding to prevent damage by static electricity

Static electricity in the work area can destroy the optical pickup (laser diode) in devices such as CD players.

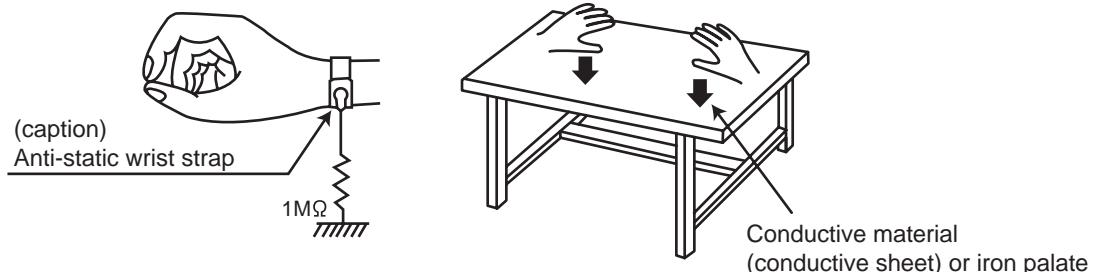

Be careful to use proper grounding in the area where repairs are being performed.

#### (1) Ground the workbench

Ground the workbench by laying conductive material (such as a conductive sheet) or an iron plate over it before placing the traverse unit (optical pickup) on it.

#### (2) Ground yourself

Use an anti-static wrist strap to release any static electricity built up in your body.

#### (3) Handling the optical pickup

- In order to maintain quality during transport and before installation, both sides of the laser diode on the replacement optical pickup are shorted. After replacement, return the shorted parts to their original condition.  
(Refer to the text.)
- Do not use a tester to check the condition of the laser diode in the optical pickup. The tester's internal power source can easily destroy the laser diode.

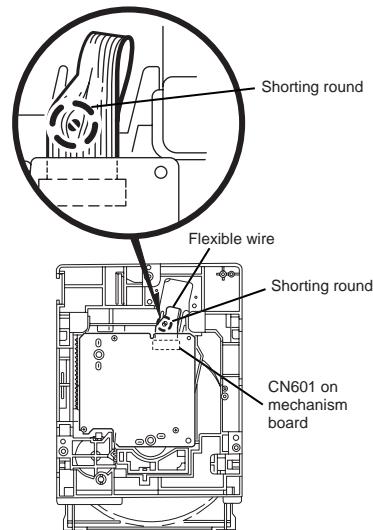

## 1.6 Handling the traverse unit (optical pickup)

- Do not subject the traverse unit (optical pickup) to strong shocks, as it is a sensitive, complex unit.
- Cut off the shorted part of the flexible cable using nippers, etc. after replacing the optical pickup. For specific details, refer to the replacement procedure in the text. Remove the anti-static pin when replacing the traverse unit. Be careful not to take too long a time when attaching it to the connector.
- Handle the flexible cable carefully as it may break when subjected to strong force.
- It is not possible to adjust the semi-fixed resistor that adjusts the laser power. Do not turn it.

## 1.7 Attention when traverse unit is decomposed

\*Please refer to "Disassembly method" in the text for the CD pickup unit.

- Apply solder to the short land sections before the flexible wire is disconnected from the connector [CN601](#) on the CD servo board.  
(If the flexible wire is disconnected without applying solder, the CD pickup may be destroyed by static electricity.)
- In the assembly, be sure to remove solder from the short land sections after connecting the flexible wire.

## 1.8 Important for laser products

### 1.CLASS 1 LASER PRODUCT

**2.DANGER :** Invisible laser radiation when open and interlock failed or defeated. Avoid direct exposure to beam.

**3.CAUTION :** There are no serviceable parts inside the Laser Unit. Do not disassemble the Laser Unit. Replace the complete Laser Unit if it malfunctions.

**4.CAUTION :** The compact disc player uses invisible laser radiation and is equipped with safety switches which prevent emission of radiation when the drawer is open and the safety interlocks have failed or are defeated. It is dangerous to defeat the safety switches.

**5.CAUTION :** If safety switches malfunction, the laser is able to function.

**6.CAUTION :** Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

**CAUTION** Please use enough caution not to see the beam directly or touch it in case of an adjustment or operation check.

**VARNING** : Osynlig laserstrålning är denna del är öppnad och spärren är urkopplad. Betrakta ej strålen.

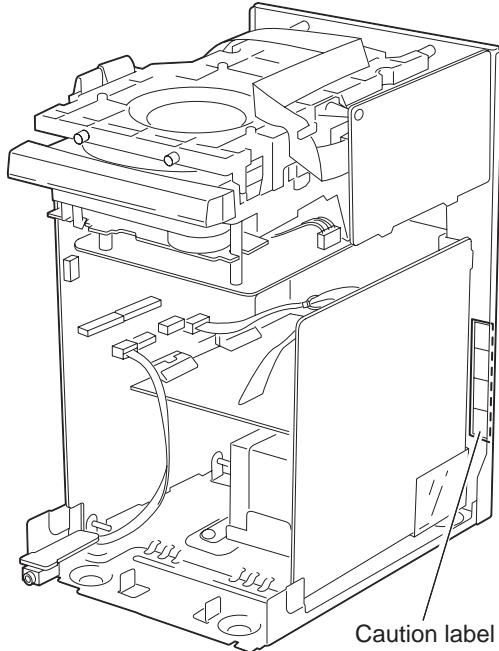

**VARO** : Avattaessa ja suojalukitus ohittaaessa olet alttiina näkymättömälle lasersäteilylle. Älä katso sääteeseen.

**ADVARSEL** : Usynlig laserstråling ved åbning , når sikkerhedsafbrydere er ude af funktion. Undgå udsættelse for stråling.

**ADVARSEL** : Usynlig laserstråling ved åpning,når sikkerhetsbryteren er avslott. unngå utsettelse for stråling.

## REPRODUCTION AND POSITION OF LABEL and PRINT

### WARNING LABEL and PRINT

## **SECTION 2**

### **SPECIFIC SERVICE INSTRUCTIONS**

This service manual does not describe SPECIFIC SERVICE INSTRUCTIONS.

## SECTION 3 DISASSEMBLY

### 3.1 Main body

#### 3.1.1 Removing the rear panel

(See Fig.1,2)

- (1) From behind the body, remove the nine screws **A** attaching the rear panel.
- (2) Turning the body upside down, remove the two screws **B** attaching the rear panel, and remove.

#### 3.1.2 Removing the side panel (L) and (R)

(See Fig.2~5)

- Prior to performing the following procedure, remove the rear panel.
- (1) Turning the body upside down, remove the two screws **C** attaching the front panel assembly.
- (2) Turning the body initial position, open the CD door while pressing the upper OPEN button.
- (3) Moving the side panel (L) in the arrow direction, remove the panel from the left side of the body.
- (4) Moving the side panel (R) in the arrow direction, remove the panel from the right side of the body.

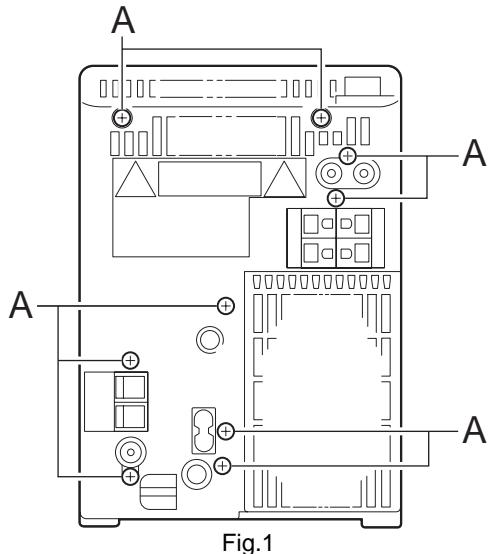

Fig.1

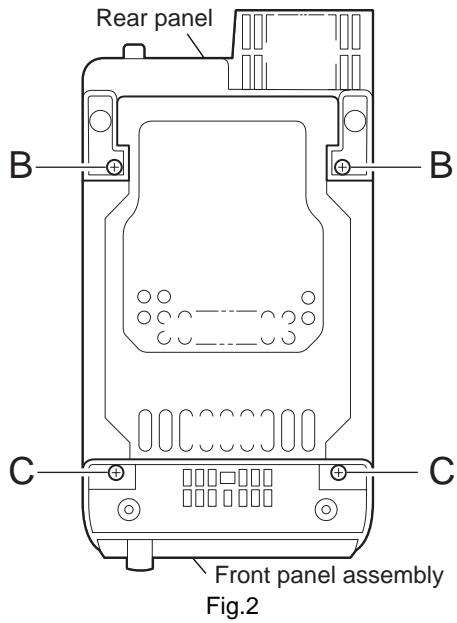

Fig.2

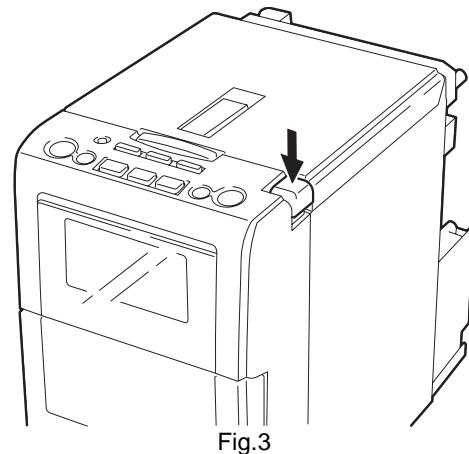

Fig.3

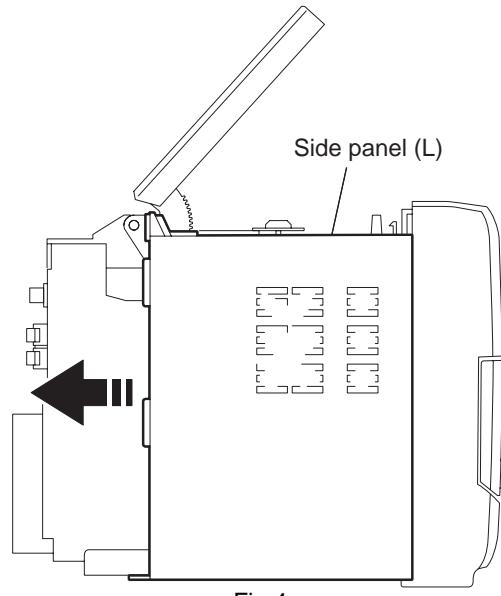

Fig.4

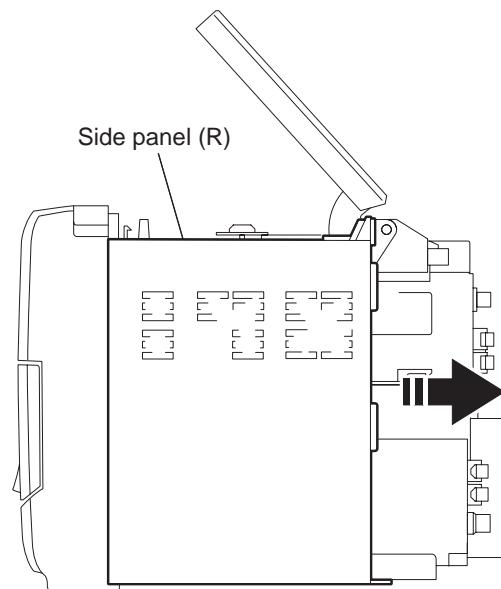

Fig.5

### 3.1.3 Removing the CD player assembly (See Fig.6,7)

- Prior to performing the following procedure, remove the rear panel and the left and right side panels.
- (1) Disconnect the card wires from the two connectors [CN603](#) and [CN604](#) on the CD servo control board.
- (2) Remove the two screws **D** attaching the front panel assembly on the both sides.
- (3) Release the two joints **a** on the both sides of the front panel assembly.
- (4) Move the CD player assembly in the direction of the arrow.

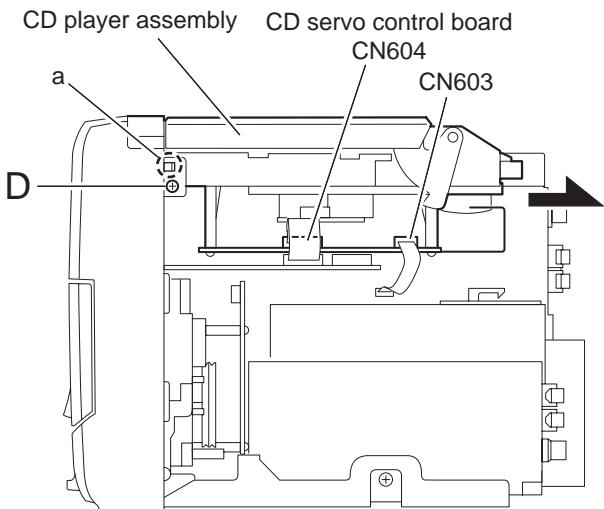

Fig.6

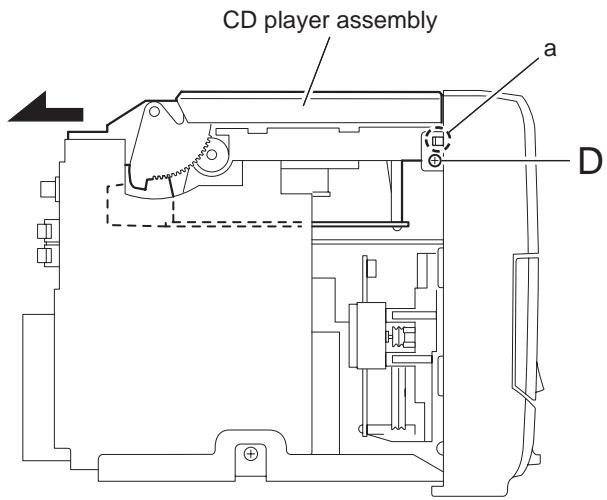

Fig.7

### 3.1.4 Removing the power amplifier board and heat sink (See Fig.8~10)

- Prior to performing the following procedure, remove the rear panel, the left and right side panels, and the CD player assembly.
- Remove the five screws **E** and **F** attaching the heat sink.
  - Disconnect the wire from connector **CN901** on the power supply board.
  - Disconnect the card wire from connector **CN305** on the power amplifier board.
  - Remove the screw **G** attaching the power amplifier board.
  - Disconnect the connector **CN301** on the power amplifier board, and release the two joints **b**.

#### REFERENCE:

Remove the screw **F**, then power amplifier board can be removed without removing heat sink.

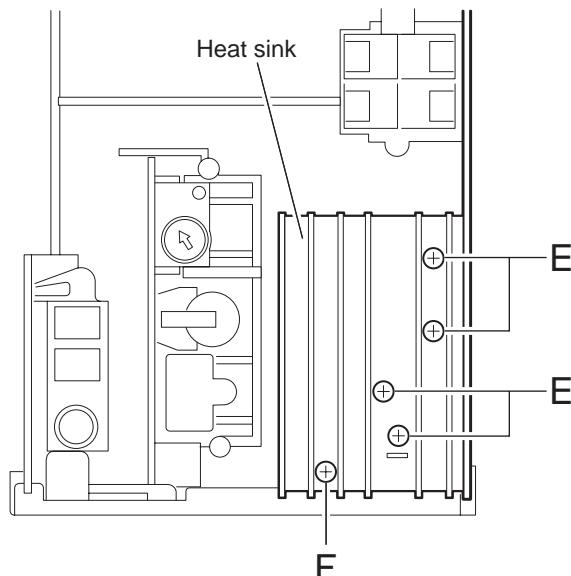

Fig.8

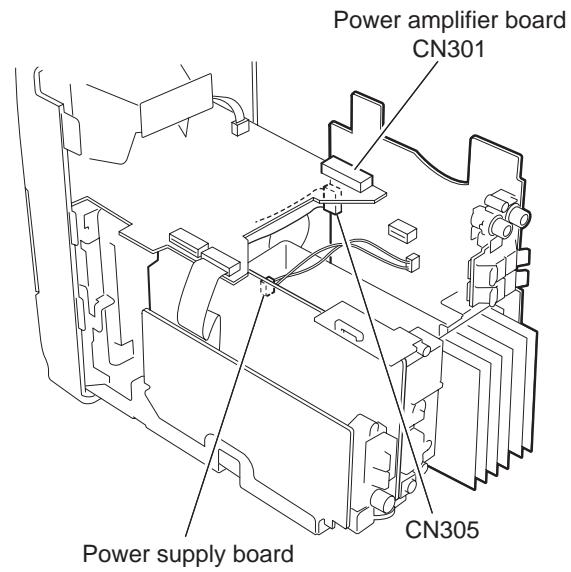

Fig.9

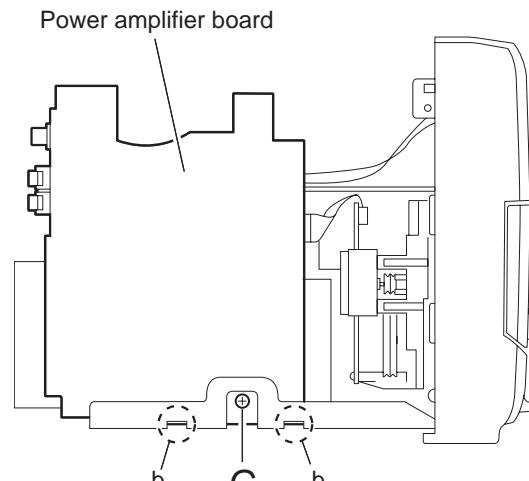

Fig.10

### 3.1.5 Removing the tuner board (See Fig.11)

- Prior to performing the following procedure, remove the rear panel, the left and right side panels, and the CD player assembly.
- Remove the screw **H** attaching the tuner board from the right side of the body.
  - Disconnect the card wire from the connector **CN1** on the tuner board.
  - Release the joint **c**, and remove the tuner board backward.

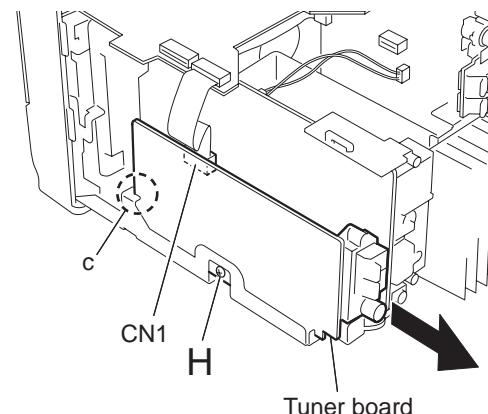

Fig.11

### 3.1.6 Removing the front panel assembly

(See Fig.12,13)

- Prior to performing the following procedure, remove the rear panel, the left and right side panels, the CD player assembly, the power amplifier board.

(1) Disconnect the card wire from the connector [CN714](#) on the LCD system CPU board.

(2) Release the joint **d** on the bottom of the front panel assembly using a screwdriver, and remove the front panel assembly toward the front.

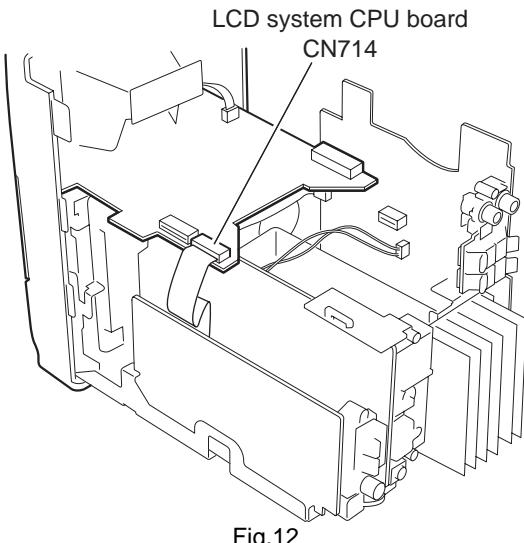

Fig.12

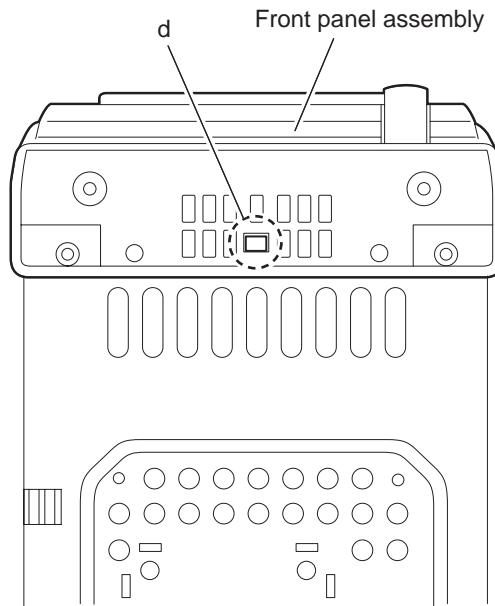

Fig.13

### 3.1.7 Remove the power transformer and power supply board

(See Fig.14,15)

- Prior to performing the following procedure, remove the rear panel, the left and right side panels, the CD player assembly, the power amplifier board and the tuner board.

(1) Remove the screw **I** attaching the jack holder and release joint **e**, and then remove jack holder.

(2) Remove the four screws **J** attaching the power transformer and power supply board.

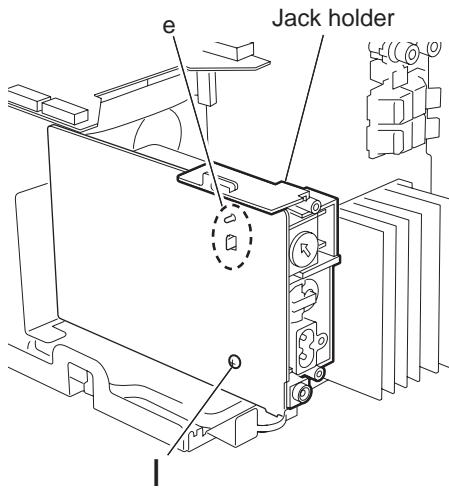

Fig.14

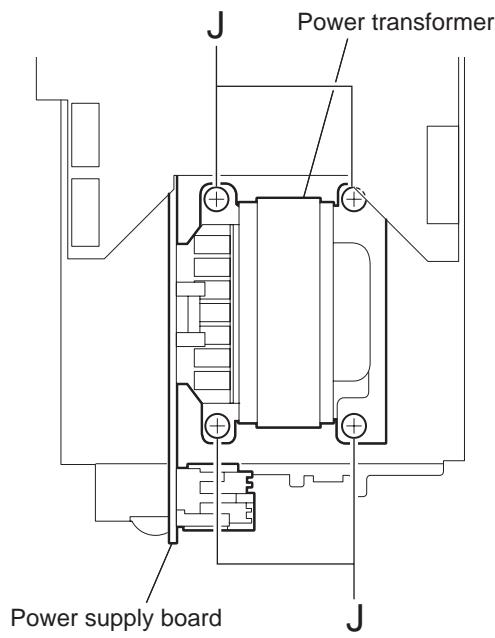

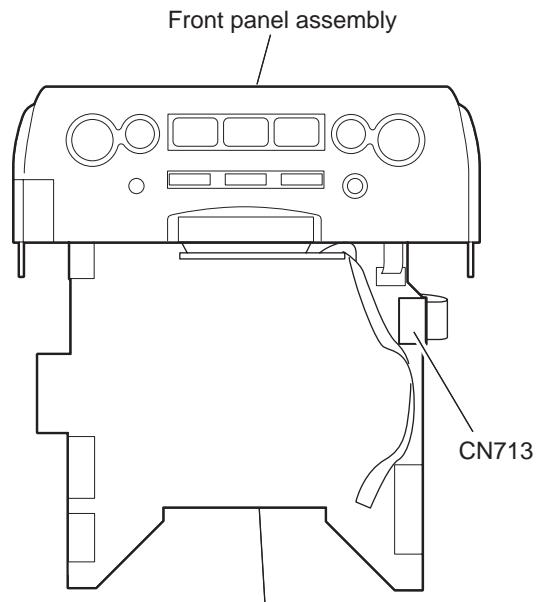

Fig.15

### 3.1.8 Remove the cassette mechanism assembly

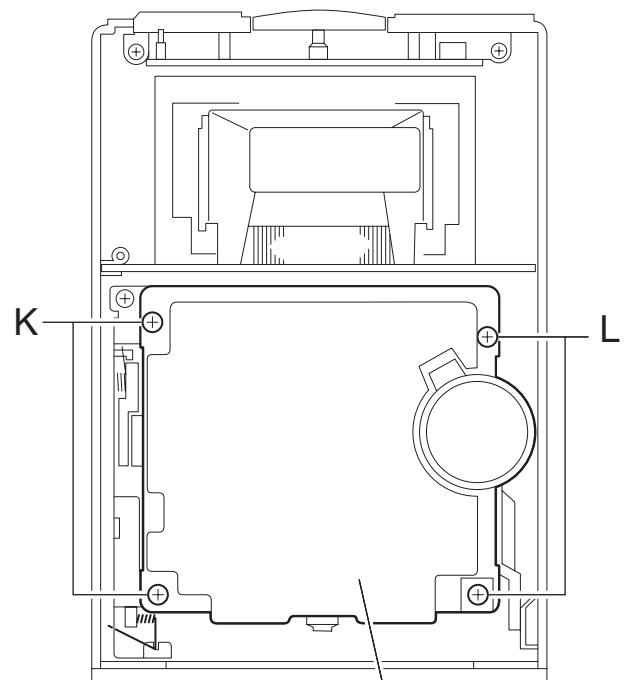

(See Fig.16,17)

- Prior to performing the following procedure, remove the front panel assembly.
- (1) Disconnect the card wire from the connector [CN713](#) on the LCD system CPU board.
- (2) Remove the four screws **K** and **L** attaching the cassette mechanism assembly, and remove.

LCD system CPU board

Fig.16

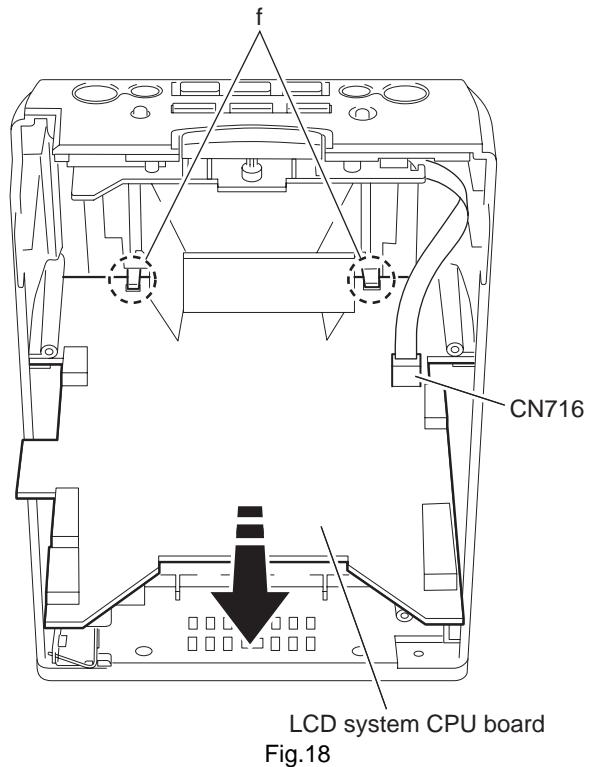

Cassette mechanism assembly  
Fig.17

### 3.1.9 Remove the LCD system CPU board

(See Fig.18)

- (1) Disconnect the wire from the connector [CN716](#) on the LCD system CPU board.
- (2) Release the two joints **f** and pull out the LCD system CPU board.

LCD system CPU board  
Fig.18

### 3.1.10 Removing the operating switch board

(See Fig.19,20)

- Prior to performing the following procedure, remove the front panel assembly, the cassette mechanism assembly and the LCD system CPU board.
- (1) Remove the two screws **M** attaching the operating switch button.
  - (2) Remove the two screws **N** attaching the operating switch board, and remove.

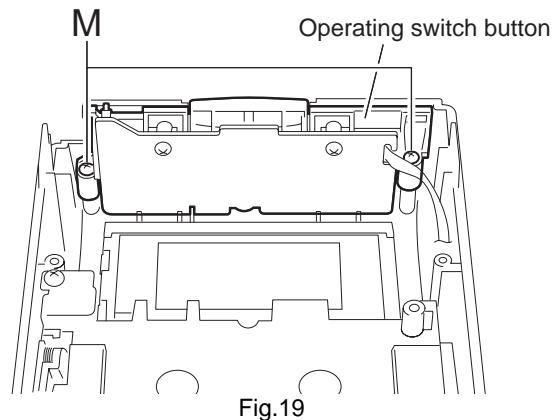

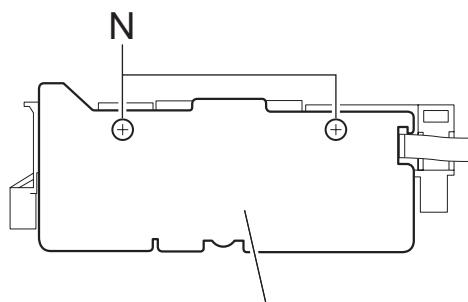

Fig.19

Operating switch board  
Fig.20

### 3.2 Cassette mechanism assembly

#### 3.2.1 Removing the Play/Record & Clear head (See Fig.1~3)

- (1) While moving the trigger arm on the right side of the head mount in the direction of the arrow, turn the flywheel R counterclockwise until the head mount comes ahead and clicks.
- (2) The head turns counterclockwise as you turn the flywheel R counterclockwise (See Fig.2 and 3).
- (3) Disconnect the flexible wire from connector [CN31](#) on the head amplifier & mechanism control board.
- (4) Remove the spring from the back of the head.
- (5) Loosen the azimuth screw for reversing attaching the head.
- (6) Remove the head on the front side of the head mount.

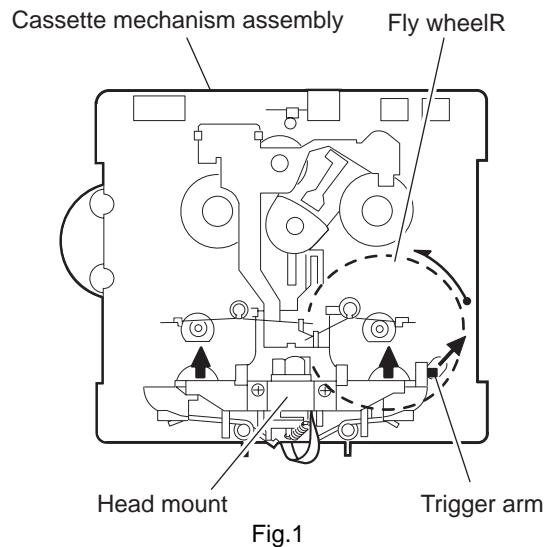

Fig.1

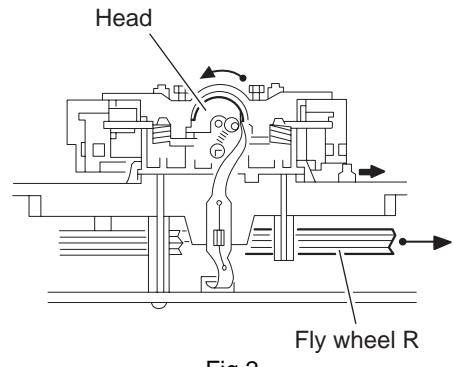

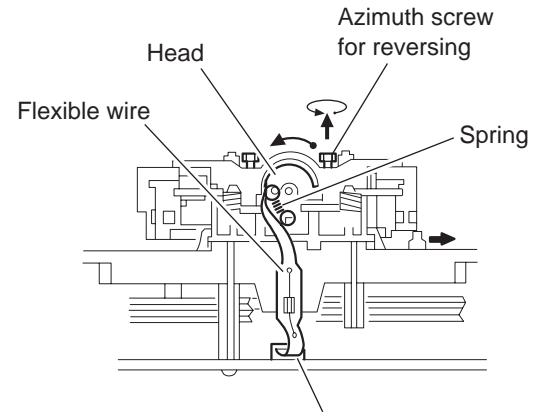

Fig.2

CN31  
Head amplifier & mecha control board  
Fig.3

### 3.2.2 Removing the head amplifier & mechanism control board (See Fig.4)

- (1) Turn over the cassette mechanism assembly and remove the three screws **A** attaching the head amplifier & mechanism control board.
- (2) Disconnect the flexible wire from connector CN31 on the head amplifier & mechanism control board.
- (3) Disconnect connector CN32 of the head amplifier & mechanism control board from connector CN1 on the reel pulse board. REFERENCE: If necessary, unsolder the 4-pin wire soldered to the main motor.

### 3.2.3 Removing the main motor (See Fig.4~7)

- (1) Remove the two screws **B**.
- (2) Half raise the motor and remove the capstan belt from the motor pulley.

#### ATTENTION:

Be careful to keep the capstan belt from grease. When reassembling, refer to Fig.6 and 7 for attaching the capstan belt.

Head amplifier & mecha control board

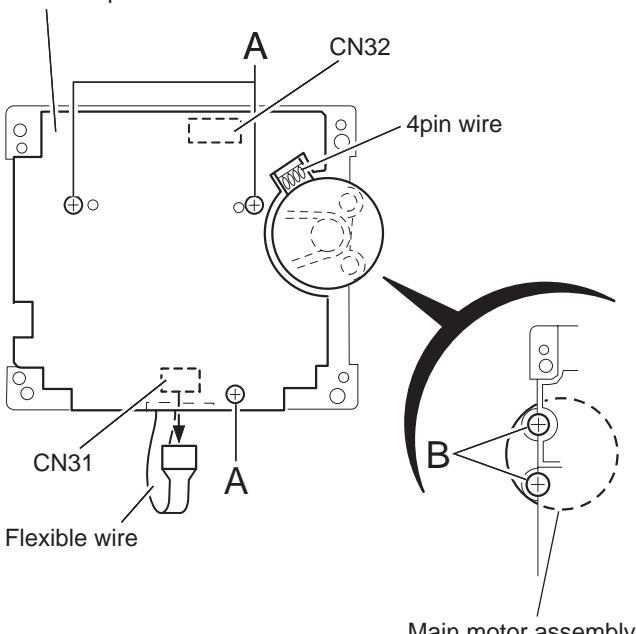

Fig.4

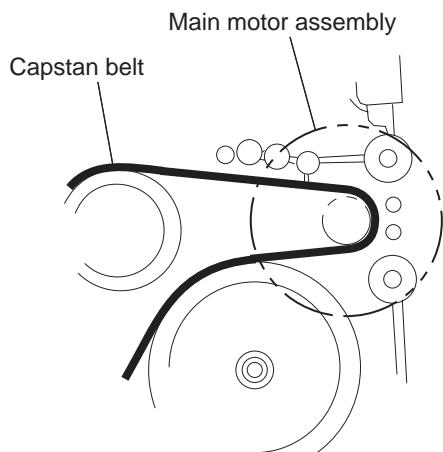

Fig.5

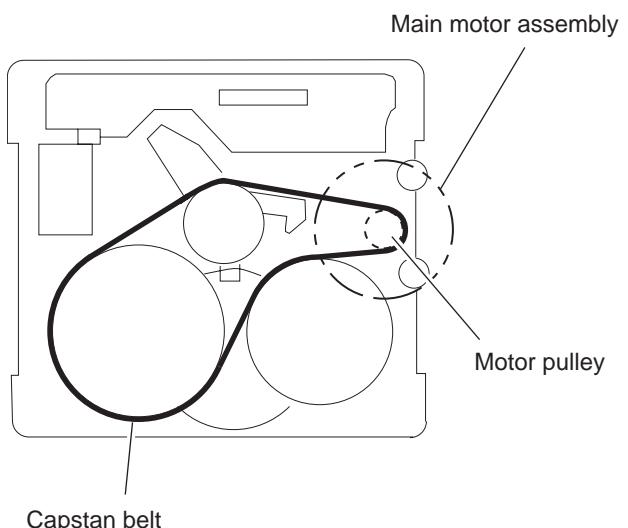

Fig.6

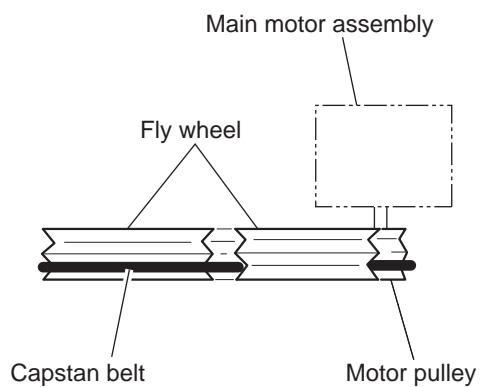

Fig.7

### 3.2.4 Removing the flywheel

(See Fig.8, 9)

- Prior to performing the following procedure, remove the head amplifier & mechanism control board and the main motor assembly.

- From the front side of the cassette mechanism, remove the slit washers attaching the capstan shaft L and R. Pull out the flywheels backward.

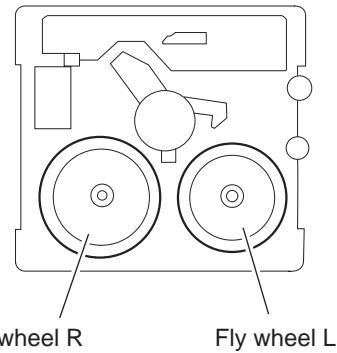

Fig.8

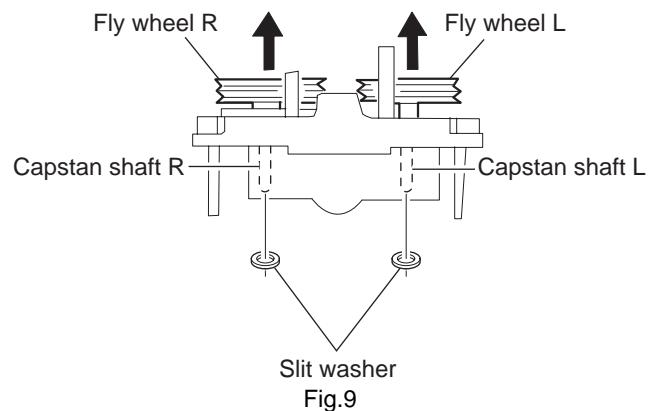

Fig.9

### 3.2.5 Removing the reel pulse board and solenoid

(See Fig.10)

- Prior to performing the following procedure, remove the head amplifier & mechanism control board.

- Remove the screw C.

- Release the tab a, b, c, d and e retaining the reel pulse board.

- Release the tab f and g attaching the solenoid on the reel pulse board.

- The reel pulse board and the solenoid come off.

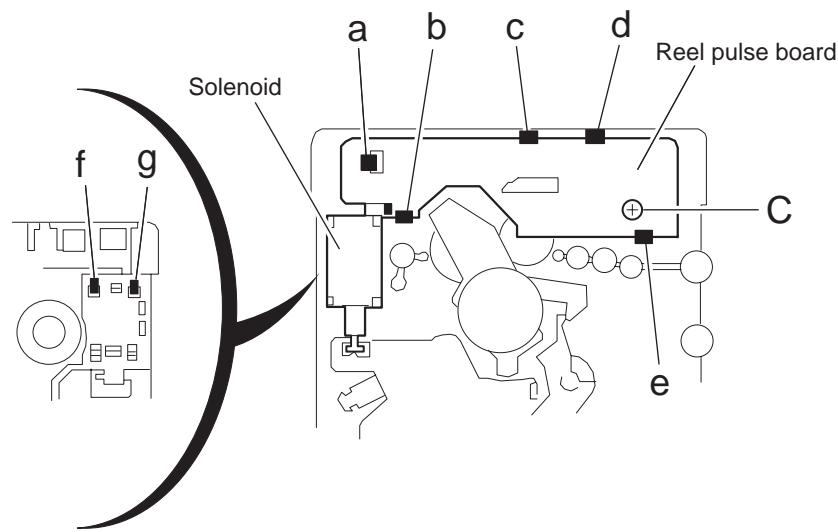

Fig.10

### 3.2.6 Reattaching the Play/ Record & Clear head (See Fig.11~13)

(1) Reattaching the head mount assembly.

- Change front of the direction cover of the head mount assembly to the left (Turn the head forward).
- Fit the bosses O', P', Q', U' and V' on the head mount assembly to the holes P and V, the slots O, U and Q of the mechanism sub assembly (See Fig.11 to 13).

#### CAUTION:

To remove the head mount assembly, turn the direction cover to the left to disengage the gear. If the gear can not be disengaged easily, push up the boss Q' slightly and raise the rear side of the head mounts slightly to return the direction lever to the reversing side.

(2) Tighten the azimuth screw for reversing.

(3) Reattach the spring from the back of the Play/ Record & Clear head.

(4) Connect the flexible wire to connector [CN31](#) on the head amplifier & mechanism control board.

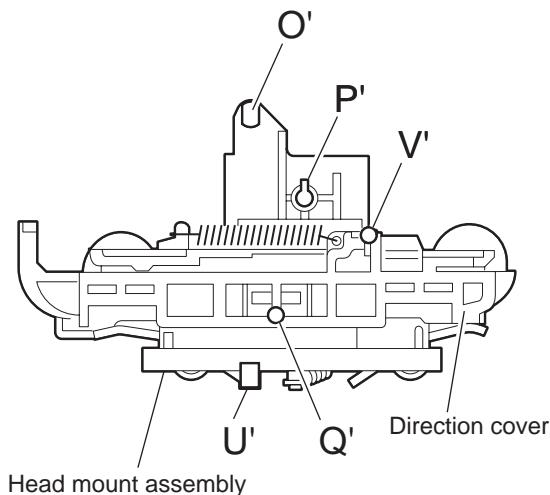

Fig.11

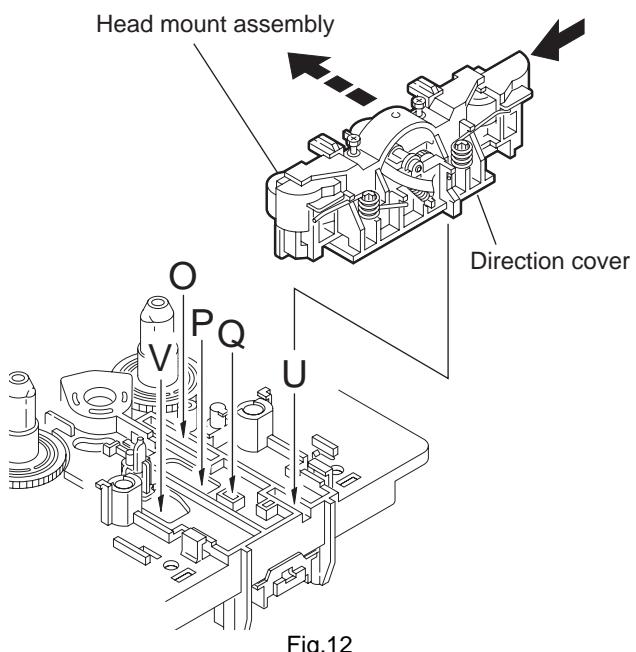

Fig.12

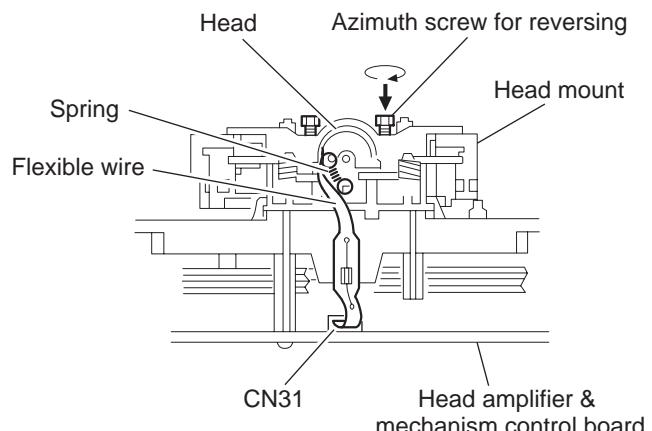

Fig.13

## SECTION 4 ADJUSTMENT

### 4.1 Measurement Instruments Required for Adjustment

- (1) Low frequency oscillator  
This oscillator should have a capacity to output 0dBs to 600Ω at an oscillation frequency of 50Hz-20kHz.
- (2) Attenuator impedance : 600Ω
- (3) Electronic voltmeter
- (4) Distortion meter
- (5) Frequency counter
- (6) Wow & flutter meter
- (7) Test tape  
VT703L : Head azimuth  
VT712 : Tape speed and running unevenness (3kHz)  
VT724 : Reference level (1kHz)
- (8) Blank tape  
TYPE I : AC-225  
TYPE II : AC-514
- (9) Torque gauge : For play and back tension  
FWD(TW2111A), REV(TW2121a) and FF/REW(TW2231A)
- (10) Test disc: CTS-1000

### 4.2 Measurement conditions

|                                     |   |
|-------------------------------------|---|
| Power supply voltage                | AC 110V/127V/230V<br>adjustable with the voltage selector,<br>50Hz/60Hz |
| Reference output                    | Speaker : 0.775V/4Ω<br>Headphone : 0.077V/32Ω                           |
| Reference frequency and input level | 1kHz, AUX : -8dBs   |
| Measurement output terminal         | at Speaker J3002  |
| Load resistance                     | 4Ω  |

#### 4.2.1 Radio Input signal

|                        |         |
|------------------------|---------|
| AM frequency           | 400Hz   |
| AM modulation          | 30%     |
| FM frequency           | 400Hz   |
| FM frequency deviation | 22.5kHz |

#### 4.2.2 Tuner section

|                              |  |
|------------------------------|--|
| Voltage applied to tuner     | +B : DC5.7V<br>VT : DC 12V                                 |
| Reference measurement output | 26.1mV(0.28V)/3Ω   |
| Input positions              | AM : Standard loop antenna<br>FM : TP1 (hot) and TP2 (GND) |

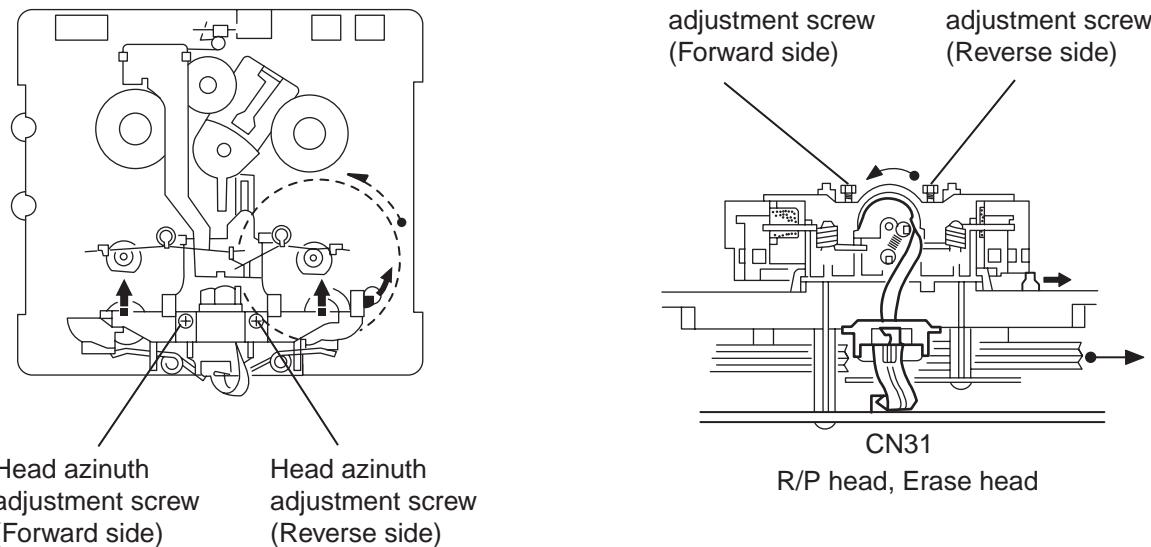

#### 4.2.3 Standard measurement position of volume

|   |              |
|---|--------------|
| Function switch                               | to Tape      |
| Beat cut switch                               | to Cut       |
| Super Bass/Active hyper Bass                  | to OFF       |
| Bass Treble                                   | to Center    |
| Adjustment of main volume to reference output | VOL : 0.775V |

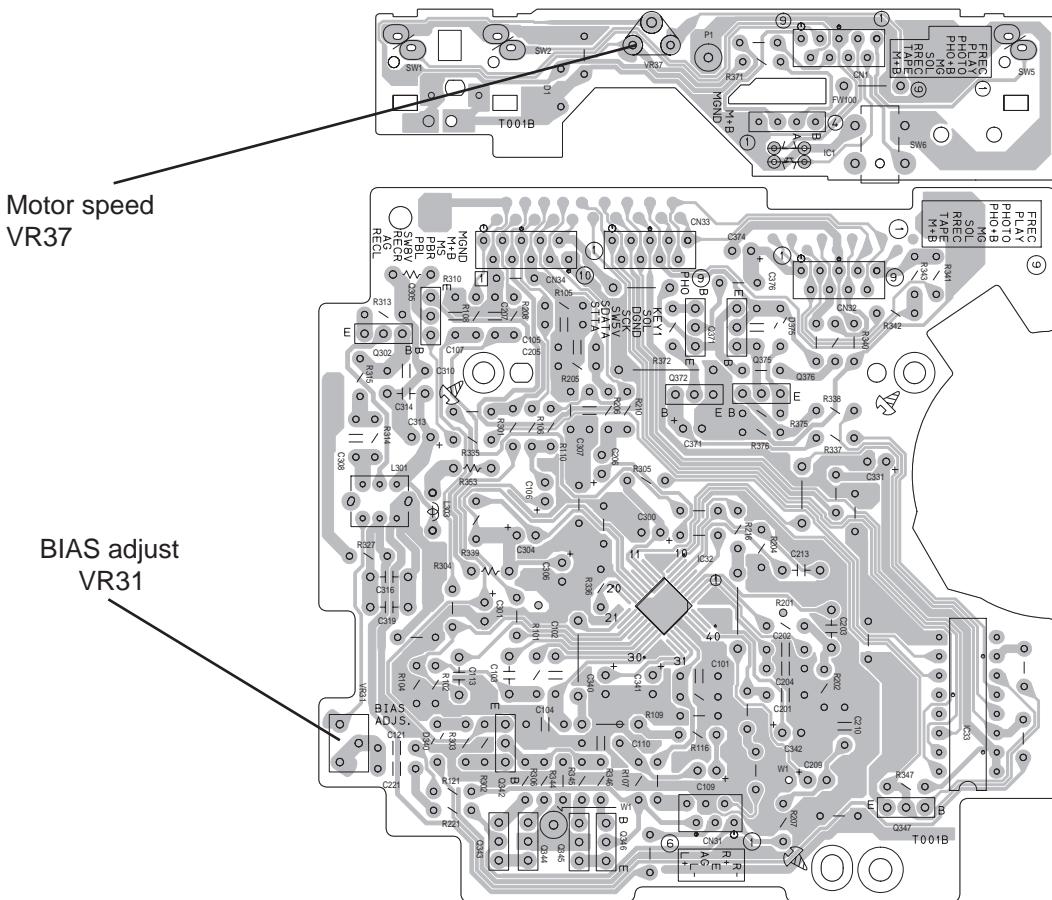

#### Precautions for measurement

- (1) Apply 30pF and 33kΩ to the IF sweeper output side and 0.082μ F and 100kΩ in series to the sweeper input side.
- (2) The IF sweeper output level should be made as low as possible within the adjustable range.
- (3) Since the IF sweeper is a fixed device, there is no need to adjust this sweeper.
- (4) Since a ceramic oscillator is used, there is no need to perform any MIX adjustment.
- (5) Since a fixed coil is used, there is no need to adjust the FM tracking.
- (6) The input and output earth systems are separated. In case of simultaneously measuring the voltage in both of the input and output systems with an electronic voltmeter for two channels, therefore, the earth should be connected particularly carefully.
- (7) In the case of BTL connection amp., the minus terminal of speaker is not for earthing. Therefore, be sure not to connect any other earth terminal to this terminal. This system is of an BTL system.
- (8) For connecting a dummy resistor when measuring the output, use the wire with a greater code size.
- (9) Whenever any mixed tape is used, use the band pass filter (DV-12).

#### **4.3 Cassette mechanism adjustment**

## Mecha control board

#### 4.3.1 Mechanism section

| Item         | Condition  | Measurement method  | Ref. value      | Adjustment position         |
|--------------|--|---|-----------------|-----------------------------|
| Head azimuth | Test tape<br>:VT703L (8kHz)<br>Output terminal<br>:Speaker out                 | (1) Playback the test tape VT703L (8kHz).<br>(2) Adjust to maximum output level by azimuth adjustment screw for forward side and reverse side.<br>(3) This adjustment is adjust by adjustment screw of forward side and adjustment screw of reverse side. | Maximum output  | Only adjust at changed head |

#### 4.3.2 Electrical adjustment

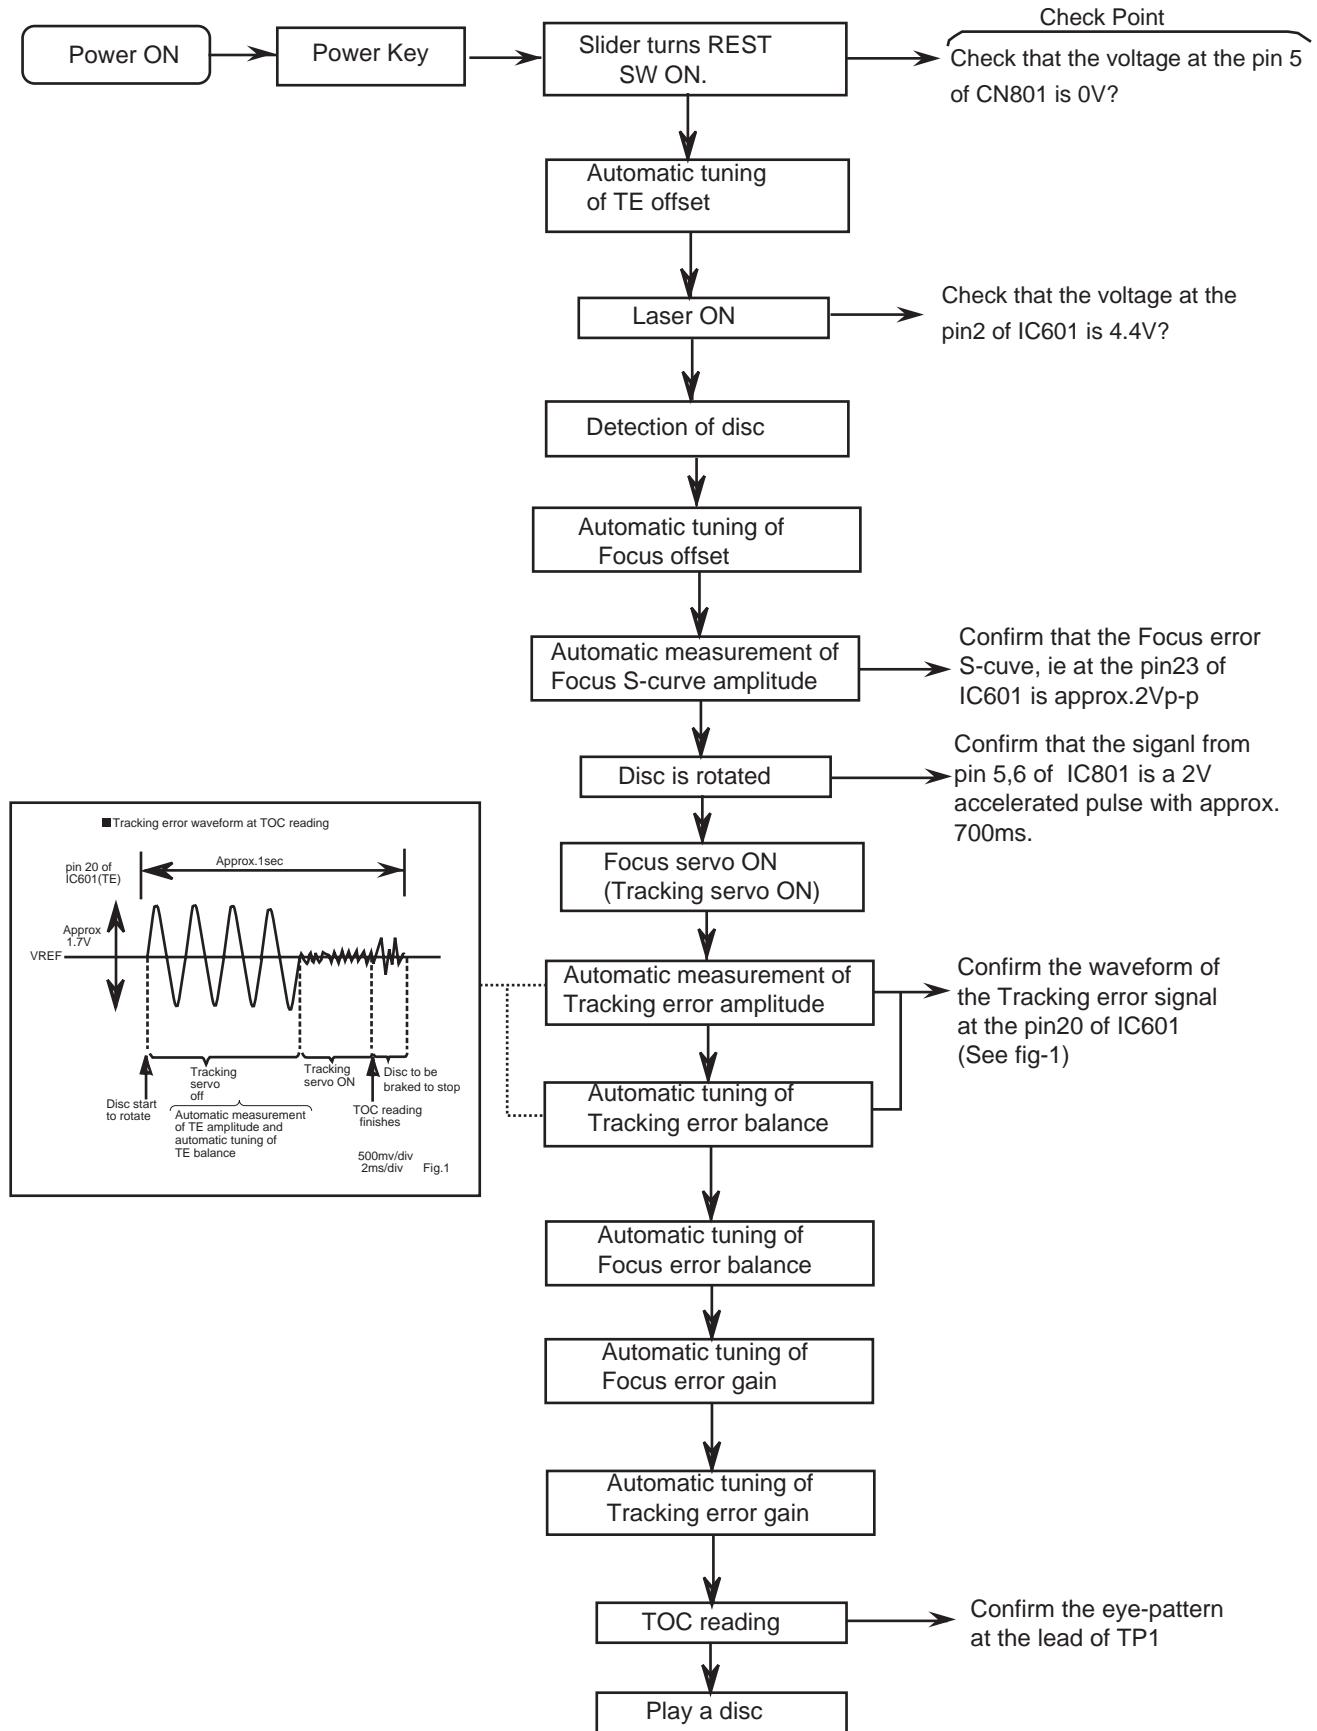

| Item                            | Condition  | Measurement method   | Ref. value                                   | Adjustment position  |
|---------------------------------|--|--|--|----------------------|
| Recording BIAS adjustment       | <ul style="list-style-type: none"> <li>• Forward or Reverse</li> <li>• Test tape : AC-514 TYPE II<br/>: AC-225 TYPE I</li> <li>• Output terminal<br/>Recording head</li> </ul>     | <p>(1) Set the test tape(AC-514 TYPE II and AC-225 TYPE I), then make REC/PAUSE condition.</p> <p>(2) Connect 100Ω to recording head by series, then connect to VTVM for measurement the current.</p> <p>(3) After setting, start the recording by release the PAUSE, in this time bias current adjust to next fig. by <a href="#">VR31</a> for Lch and <a href="#">VR32</a> for Rch.<br/>4.0 μA (TYPE II) and 4.20 μA (TYPE I).</p> | AC-225<br>: 4.20μA<br>AC-514<br>: 4.0μA      | <a href="#">VR31</a> |
| R/P playback frequency response | <ul style="list-style-type: none"> <li>• Reference frequency : 1kHz / 10kHz (Reference: -20dB)</li> <li>• Test tape : AC-514 TYPE II</li> <li>• Input terminal : OSC IN</li> </ul> | <p>(1) Set the test tape (AC-514 TYPE ), then make REC/PAUSE condition.</p> <p>(2) Release the PAUSE, then start recording the 1kHz and 10kHz of reference frequency from oscillator.</p> <p>(3) Playback the recorded position, 1kHz and 10kHz output deviation should -1dB 2dB to readjust by <a href="#">VR31</a> for Lch and <a href="#">VR32</a> for Rch.</p>   | Output deviation<br>1kHz/10kHz<br>-1dB ± 2dB | <a href="#">VR31</a> |

#### 4.3.3 Electrical response confirmation

| Item                            | Condition   | Measurement method   | Ref. value                               | Adjustment position |
|---------------------------------|---|--|--|---------------------|
| Recording bias current          | <ul style="list-style-type: none"> <li>• Forward or Reverse</li> <li>• Test tape : TYPE II (AC-514)</li> <li>• Measurement terminal : BIAS test point on printed circuit board</li> </ul>                       | <p>(1) Change BIAS1 and 2, confirm the frequency should be change.</p> <p>(2) Set the test tape (AC-514 TYPE II), then make REC/PAUSE condition.</p> <p>(3) Confirm the frequency should 100Hz ± 6kHz at BIAS test point on printed circuit board.</p> | 100 kHz ± 6 kHz                          |                     |
| Erase current (reference value) | <ul style="list-style-type: none"> <li>• Forward or Reverse</li> <li>• Rec condition</li> <li>Test tape : AC-514 TYPE II<br/>: AC-225 TYPE I</li> <li>• Measurement terminal Both side of Erase head</li> </ul> | <p>(1) Set the test tape (AC-514 TYPE II and AC-225 TYPE I), then make REC/PAUSE condition.</p> <p>(2) Release the PAUSE to REC condition, connect 1W to ERASE head by series, then confirm the erase current at both side of erase head.</p>          | TYPE II<br>: 120 mA<br>TYPE I<br>: 75 mA |                     |

## SECTION 5 TROUBLESHOOTING

### 5.1 Flow of functional operation until TOC read (CD)

## 5.2 Maintenance of laser pickup (CD)

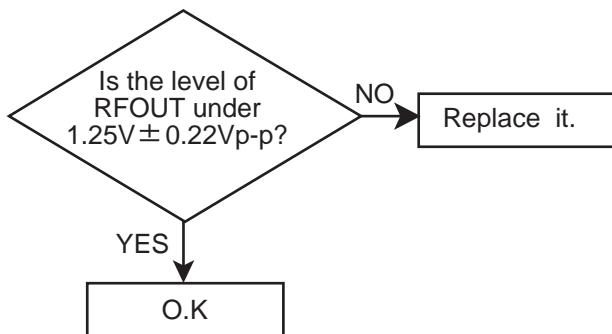

### (1) Cleaning the pick up lens

Before you replace the pick up, please try to clean the lens with a alcohol soaked cotton swab.

### (2) Life of the laser diode

When the life of the laser diode has expired, the following symptoms will appear.

- The level of RF output (EFM output : amplitude of eye pattern) will below.

### (3) Semi-fixed resistor on the APC PC board

The semi-fixed resistor on the APC printed circuit board which is attached to the pickup is used to adjust the laser power. Since this adjustment should be performed to match the characteristics of the whole optical block, do not touch the semi-fixed resistor.

If the laser power is lower than the specified value, the laser diode is almost worn out, and the laser pickup should be replaced.

If the semi-fixed resistor is adjusted while the pickup is functioning normally, the laser pickup may be damaged due to excessive current.

## 5.3 Replacement of laser pickup (CD)

Turn off the power switch and, disconnect the power cord from the ac outlet.

Replace the pickup with a normal one.(Refer to "Pickup Removal" on the previous page)

Plug the power cord in, and turn the power on. At this time, check that the laser emits for about 3seconds and the objective lens moves up and down.  
Note: Do not observe the laser beam directly.

Play a disc.

Check the eye-pattern at TP1.

Finish.

In regard with component parts appearing on the silk-screen printed side (parts side) of the PWB diagrams, the parts that are printed over with black such as the resistor (-■-), diode (■) and ICP (●) or identified by the "Δ" mark nearby are critical for safety.

(This regulation does not correspond to J and C version.)
